WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** SW-W gusts to 35 mph with low relative humidity far eastside Sunday afternoon ***

*** Afternoon gusts to 25 mph and locally higher daily through Saturday in the N & E mountains and through the Bay Area and Delta ***

A low pressure trough will be over Northern California through Saturday. Afternoon SW-W winds from the Cascade-Sierra crest east and through the Bay Area and Delta will gust to 25 mph with a few spots up to 30 mph. In far northern areas over the higher terrain NW-NE winds will gust to 25 mph with a few higher gusts during afternoons and evenings through Saturday. Temperatures throughout the region will be near normal through Saturday. Inland minimum relative humidity (RH) will continue around 10-20%, except 7-17% east of the crest. The marine layer is 2,500-3,000 feet deep and cool humid marine air will continue to move well inland through the coastal range and into the Sacramento Valley each night. Some inland mid and upper slope locations will still only see RH recovery to 35-45%, but in general overnight RH recovery has improved quite a bit.

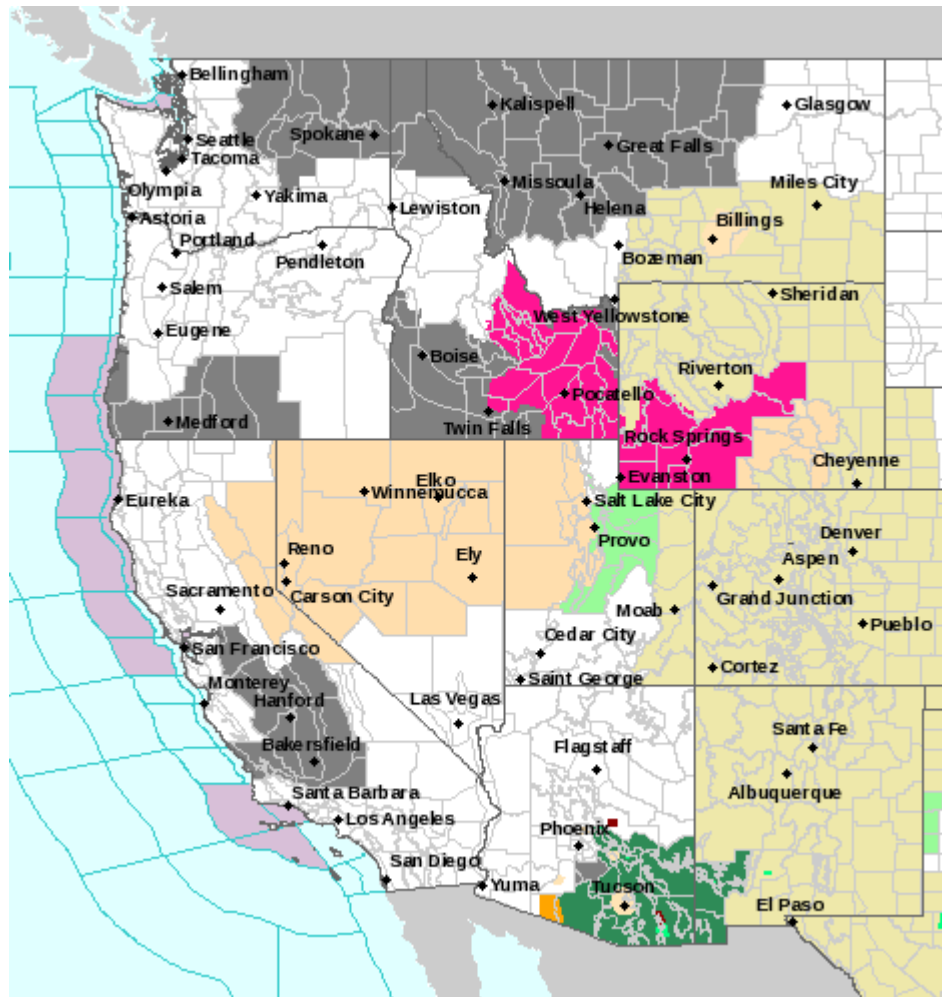

The trough will move off to the east on Sunday. SW-W winds near and east of the northern CA-NV state line will gust to 35 mph and locally higher Sunday afternoon with RH continuing in the 8-18% range. The NE California and Northern Sierra PSAs will see widespread gusts to 25 mph with higher gusts in a few spots as low RH continues. The remainder of the region will be dry and cooler than normal with local NW-NE breezes Sunday afternoon. Winds will be lighter in all areas Monday-Wednesday as a weak low pressure trough sets up overhead. There may be some areas of light offshore winds along the north coast with this pattern. The trough will deepen late Wednesday and remain in place at least through the end of the week, producing a slight chance of light showers in far northern areas as well as stronger SW winds in the usual areas.

SOUTHERN CALIFORNIA

*** Strong westerly winds across the mountains and deserts through the end of next week ***

A Pacific trough over the West Coast will bring westerly afternoon and evening winds of 20 to 30 mph with gusts to 50 mph to the mountain ridges and desert passes through the end of next week. Temperatures will be near to around 5 degrees below normal through the end of next week, with 70s to low 80s across the mountains and mid 80s to mid 90s in the valleys. Minimum humidity will be mainly between 15% and 30% away from the coastal areas through the end of next week. No shower or thunderstorm activity is anticipated across the region through the end of next week.

- **2018-LAW-50669, 08/23/18, 2015 hours:** The International Emergency Response Coordination Center (IERCC) reported a PLB activation plotting to the area of White Bear Pass in Fresno County. The registered owner (R/O) was contacted by another hiker who reported his friend, a 72 year old male, had broken his leg and was approximately 6 miles away. The Cal OES Law Enforcement Duty Officer (LDO) notified Fresno Sheriff for a SAR response. Fresno Sheriff coordinating a SAR response for the morning of 08/24/18. **Update:** 08/24/18, 0900 hours, Fresno SO helicopter searching for subject. So far unable to locate (UTL). **Mission Ongoing.**
- **2018-LAW-50637, 08/22/18, 2236 hours:** The Air Force Rescue Coordination Center (AFRCC) advised of an ALNOT of a plane out of San Diego. The Cessna CN74 had taken off near El Cajon with the owner and student passenger on board, and was several hours overdue. San Diego Sheriff's Office was already looking for the aircraft prior to the LDO notification. Civil Air Patrol (CAP) was activated, and at 0048 hours gave coordinates as a possible location for the aircraft. San Diego was notified of the coordinates and at 0211 hours, located a crash site in the area. Due to steep terrain, trees, and rocks they were unable to land or verify the tail numbers on the plane. San Diego SAR Coordinator was notified of the incident. At 0630 hours, search efforts were grounded due to fog and limited visibility. **Update:** 08/23/18, 0849 hours, Wreckage and two fatalities confirmed. Tail number confirmed. **Mission Ongoing.**
